## WOODPILE AND TARP INFORMATION

Fire-resistant tarps or covers are required on woodpiles from June 1<sup>st</sup> to September 30<sup>th</sup> of each year if 30 feet or more of clearance from a structure cannot be obtained. Tarps must prevent embers from getting in or around woodpiles and they must be properly secured. The California State Fire Marshal seal must be permanently attached to the tarp material. As an alternative, up to three sides of the woodpile may have 1/16 inch metal screen distanced at least a one inch away from the firewood. The screen must be firmly attached to the deck rail or other permanent structure. Screens and tarps must completely cover and surround the woodpile. A wood box that completely surrounds the wood is also an acceptable means of compliance.

Below are some vendors who sell the appropriate fire-resistant tarps:
